CY Series Imaging Part

Image processing, display and recording All-in-one

Specification	
Model	VLM-03
Size	8 inches
Weight	1.05 Kg
Storage	32 GB
Display resolution	1024*768 pixels
Video output capacity	HDMl, max 1920*1080 pixels
Battery capacity	>6400 mAh
Battery working time	Maximum 4 hours
Function	Photo, video, white balance, freeze

Easier Cystoscopy both for Doctor and Patient

The HugeMed™ CY series flexible video cystoscope is single-use, portable and easy to operate, which are helpful for operating cystoscopy in the OPD or community hospital where could not equipped the transitional heavy and expensive devices. Meanwhile, the flexibility makes patients more comfortable, even without anesthesia.

Featrue

Portable

Cost-effectiv

No Cross-infectio

Always Ready To G

CY-M52 5.2/2.2

A general model that is always ready for your need without any sterilization processing waiting. The HD output capability brings more details for your daily examination and biopsy.

CY-M40 4.0/1.2

Slimer allows for smoother and easier insertion, especially for patients with smaller urethras, such as children and women, as well as in patients with strictures or other urethral abnormalities.

CY-M32 3.2/1.2

Ultra slim model for special cases.

Standard configuration Suction Function

The suction function helps to clear the visual field by removing debris and fluid, providing better visualization of the area being examined during the cystoscopy.

Deflection	Field of View	Total Length	Working Length	Direction of View
210° Up/ Down	120°	610mm	350mm	0°

Upgraded Tip

The brand-new generation of the CMOS sensor is offering a brand-new experience of visualization. While the bullet tip design leads to a smoother insertion for reducing pain to the patients.

210° up and down Bending Angle

The 210° bending degree provides better access and visualization of the bladder including the trigonal region, leading to a more comprehensive examination and more accurate diagnosis and treatment.
